

Index

- advance time 122, 124, 125, 126, 127
- asymmetric window functions 75
- binomial coefficient 87, 108
- binomial window function 88
- CCRMA 17
- Chaigne, A. 18
- complementary fractional delay 86, 129, 130
- CORDIS 18
- Cramer's rule 84
- cross-fading method 117
- decimation 104, 129
- deinterpolation 21, 128–134, 155
- deinterpolation' 21
- digital delay line 66
- digital differentiator 60
- digital waveguide 17, 26, 63
- direct form I structure 104
- direct form II structure 121
- discrete-time allpass filter 105
- discrete-time Fourier transform 66
- Farrow structure 103
- floor function 30, 41, 67
- fractional delay 20, 21, 22, 24
- fractional spatial index 141
- generalized Karplus–Strong model 28
- Gibbs phenomenon 74, 75
- greatest integer function 67
- group delay 69, 106
- Horner's method 98
- impulse-invariant method 40, 54, 55, 56, 57, 63
- input-switching method 118, 119
- inverse filtering 32
- inverse interpolation 129
- IRCAM 18, 19
- Karplus–Strong algorithm 17, 27
- Kelly–Lochbaum model 34, 35, 42, 137
- Kronecker delta 84, 90
- linear interpolation 86, 98, 99, 103
- loop filter 27, 30
- loop gain 31, 92
- modal synthesis 18
- Modalys 19
- Parseval's relation 72
- phase delay 69, 106
- physical modeling 17–19
- piecewise parabolic interpolation 103
- plane waves 34
- reflection coefficient 37, 39, 44
- Rodet, X. 18
- sampling theorem 68
- scattering 36
- Shannon, C. E. 68
- short-time Fourier transform 30
- sinc function 68
- Smith, J. O. 17, 25, 27, 30, 48, 62, 63
- source-filter model 17, 18
- speech synthesis 17, 34, 119
- splines 75, 103
- tangent-line interpolation 102
- Tarczynski bound 71
- Thiran allpass filter 107–113, 123–126
- transmission coefficient 37
- uniform tube 151
- Vandermonde matrix 97
- variable-length digital delay line 115, 158
- variable-length digital waveguide 135
- wave digital filters 62
- waveguide synthesis 19
- Yamaha VL-1 19
- ZZ method 119, 121
